

Revised 9/4/09

MAXIMUM TIME FRAMES
Exhibit A for SHRP Policy 3.1.2
Satisfactory Academic Progress

Students must make satisfactory progress toward completion of program requirements for graduation within the Maximum Time Frame. Program Directors shall evaluate each student's progress toward completion within the Maximum Time Frame by comparing (for undergraduates) the number of credit hours attempted with credit hours earned or (for graduate students) the number of semesters attempted with the number of semesters permitted.

Except where indicated, credit hours listed represent credit hours attempted in SHRP undergraduate courses. The Maximum Time Frame for completion of undergraduate programs is 150% of the usual, expected completion time.

Semesters listed represent semesters enrolled in SHRP graduate courses. The Maximum Time Frame for graduate programs is established by the program.

Credit hours and semesters attempted at partner or other institutions are not included in the calculation of Maximum Time Frame, except for Bachelor of Science in Health Sciences programs and Health Information Management programs. Periods of approved Leaves of Absence and any periods of inactive status are not included in the calculation of Maximum Time Frame.
