

Integrated Employment Institute 2008 Fall Training Series Calendar

Training in the Delivery of Employment Services

Employment services for individuals living with psychiatric disabilities have long been recognized as a key recovery-oriented service. In this era of “system’s transformation” more and more service providers are exploring strategies to integrate employment services into their programs. Trainings in this series are best suited for staff currently working to deliver employment services (e.g., PACT programs) and/or other providers looking to increase employment outcomes for the individuals they serve (e.g., residential programs).
